

BFYE 111 : First-Year Experience Seminars

These seminars introduce students to the curriculum of Bethany College in the context and environment of a professional learning community through development and explanation of the expectations of being a successful college student. This course is designed to familiarize students with the academic life, geography, and resources of the College, to provide skills for intellectual, physical, and emotional well-being, and to introduce the idea of service learning for one's community. Additionally, this course is designed to help students improve writing and thinking skills through analysis of a text or writings chosen by the faculty instructor. The faculty member who leads a student's seminar will serve as that student's academic advisor and mentor, and students will meet with their advisor several times over the semester to discuss academic progress.
