

# MATH 201 : Calculus I

This course is a study of the real number system, equations of a line, functions, limits, and continuity, and of techniques of differentiation and integration applied to maximum and minimum problems and to related rates. (The course includes four hours of class and one laboratory session each week.)

**Credits** 4.0

**Prerequisites**

Level IV mathematics placement; successful completion of a Level III mathematics course or equivalent; or permission of the instructor
