THEA 253 : AutoCAD I

Students will learn to use the software, AutoCAD, as a drafting and design tool. They will learn how to create a virtual workspace, to draft in that workspace and how to use this tool to communicate their designs. Concepts covered will include: drafting, layers, text, objects, and modifying properties, and inserting raster images. They will also learn how to plot and email their work, in order to share it with other sources. (Students are required to have access to a personal computer to which they can download the free software. Laptop computers are preferable, but not required. AutoCAD is not compatible with Macintosh computers, so a Windows based computer is necessary.)
